Description

Meeting with Compliance (Cliff, Mike, Emily) this AM with WorldPay  
TIN Mismatch Reports  
Looks like somewhere between Compliance and WorldPay CORE  
Legal Entity and SubMerchant values are not correct  
Causing TIN mismatches (IRS alert that TaxId does not match the Legal Entity name)  
Need to research -  
First - Merchant Provisioning  
Then evaluate if problem not there to CN or WorldPay CORE provisioning process

Comments

Comment by Brett Roy [ 08/Jul/26 ]

Spike findings & fix — Merchant Provisioning (WorldPay CORE)

Root cause (confirmed in code): the WorldPay CORE sub-merchant *create* path swapped two fields — it sent the *SubMerchant name* into CORE's *legalName* field and the *Legal Entity name* into *dbName*. *federalTaxId* was sent correctly but paired with the wrong legal name, so the IRS TIN match fails. It only manifests when the sub-merchant/store name differs from the legal entity name (which is why alerts are a subset of CORE merchants). Location: `WorldPayCoreProvisioner.CreateSubMerchant (merchant-provisioning-ms/Infrastructure/Provisioners/WorldPayCore)`.

Not a system-wide issue: the Vantiv/CNP provisioning path maps correctly and is unaffected — this was WorldPay CORE only. ("CN" in the ticket = the CNP/Vantiv route.)

Regression history: the code was correct from the original 2024 implementation. It broke in *release 8.21* (develop merge 2025-04-23), where one line flipped *legalName* from `LegalEntity.Name` to `SubMerchant.Name`. It rode in on the *Sync/Validate SubMerchant* work of that release, unrelated to legal names. (Traced via `git log -L; git blame` misleadingly points at a later rename-only commit.)

*Scope: PR #320 fixes new boardings only. Correction of existing errored records in WorldPay is being driven by Compliance directly with WorldPay and is out of scope for this story.*

Ana Oliva (contractor) Christopher Ariel Valenzuela Medina Radhika Kandoori

### Example of the retrieve

```
"federalTaxId": "989401502",
"legalName": "LE.Name 1783978029",
"dbaName": "LE.DoingBusinessAs",
"billingDescriptor": "PDS*SM BillDesc",
```

Shikha Atal , Andy Holtsclaw . I converted the spike to a story because QA validation is required.
